

Saunaheart

The Key to Better Sauna Bathing

- ✦ Enjoy your sauna bath even more with softer, more humid air.
- ✦ Saunaheart produces a steady steam which increases the overall level of humidity, creating air which feels nicer to the skin, and is easier to breathe.
- ✦ The stainless steel cylinder is embedded in the heater stones, touching the heater elements, and leaving only the steam cup visible.
- ✦ Fill by pouring water into the steam cup with a long handled Sauna dipper—which can be done while bathing.*
- ✦ When completely full, the Saunaheart will steam up to one half hour.
- ✦ Avoid the unpleasant dry air that sometimes occurs in the sauna and bathe longer in a more comfortable environment.

* WARNING! When filling Saunaheart tube with water, use long handled dipper only, as steam is hot and can burn fingers or hand.

NEW
SAUNA INNOVATION

Saunaheart

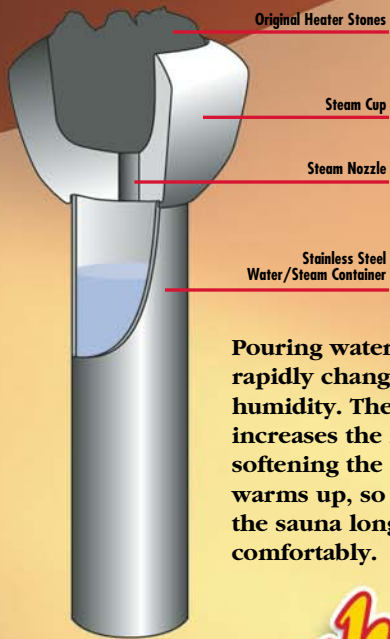

Air Humidifier

Add to your Sauna pleasure at home,
or give as the ideal Sauna gift.

These products are developed and
manufactured in Finland —
where Sauna originated.

- ✦ Install In Sauna Heater ✦
- ✦ Fill With Water ✦
- ✦ Enjoy Soft Sauna Air ✦

Saunaheart dimensions are 9 3/4" tall by 3 3/4" in diameter when the steam cup is in place.

Pouring water on heater stones rapidly changes the level of humidity. The Saunaheart increases the humidity slowly, softening the air as the heater warms up, so you can enjoy the sauna longer and more comfortably.

Saunaheart

One Saunaheart filling steams for about 30 minutes, doubling the basic humidity level in a 6'x 8'x 7' sauna room. The stainless steel water container is installed between the sauna heater's elements producing a constant soft steam.

Slow Drip

Quick Drip

Evaporation

Drip and Evaporation

Choose from four options to regulate the aroma intensity.

Sauna Thermometer

Add charm to your sauna with this 5 1/2" x 6 3/8" ceramic bucket thermometer. Built-in hole for hanging.

Sauna Aroma Dispenser

Attractive 6" diameter hanging ceramic basin creates a soothing scent by allowing droplets to fall onto the heater stones, or by evaporation, or a combination of both drops and evaporation. Drip rate can be controlled by adjusting regulator plug at the bottom of the cup.

Easy to install—hangs above the Sauna heater.
